

News & Bulletin

BULLETIN NEWS.

Yesterday's city tax receipts were \$930.31. The St. Thomas base ballists play in Phelps to-day. Dr. J. B. Hozie has lost a promising four year old colt. The fine residence of the late E. H. Groot, on Genesee street is to rent. Prof. Flagler and family are expected from Europe about the 14th of August. Warren M. Brinkerhoff of this city has been granted a patent for a lubricator. N. P. Waller left for Grand Rapids, Michigan, by the 6:27 train this morning. Officer Tobin's illness reduces the day police force to the chief and two men, to-day. The schooners Mott, Mitchell and Finney are at Fair Haven taking coal for Chicago. Mr. and Mrs. George Grenville left last evening for a few days recreation in the country. W. L. Arven formerly with Dunning & Co., and now in Milwaukee, is coming back to Auburn to locate. The Calculators are picknicking at Glen Haven to-day, and Nieha's orchestra is with them. They went at 8:30. Conductor Burns, of the Central-Hudson, is temporarily under the weather and Conductor Campbell ran the 11:02 west to-day. Three boat loads of berry individuals were capized on the outlet, last evening, one by Stanfield's and two near the island. No fatalities. Mrs. O. H. Burdick Jr. and son, of Auburn N. Y., are visiting at the residence of Theo. Horton, Esq., Tioga. Osego Times. J. Parsons Curtis returned home to-day from a summer visit to the regions of Summerhill and vicinity, among the trout and leopards. The Gaylord House base ball nine would like to meet a nine from any of the other hotels in the city some day next week, Osborne House preferred. Miss Grace Dunn, of South Bend, Ind., arrived at 11:02 this morning, and will remain through August with Misses Clara and Lillian Crawford, of this city. The fine steam yacht Rachel, Capt. Easton, is to be let for pleasure parties on Oswego Lake, by day or evening. Capt. Easton can be found at 58 State-st. Mrs. Ives, a claimant for a dower interest in 17 acres of Syracuse, was last evening convinced that her claims are groundless and the matter will not come up in court. The Four A's and the re-organized Tranklins, of this city, will play an interesting game at the fair grounds, to-morrow afternoon. The Franklins have a strong team. Auburn's first aquatic event of this season will be a two-mile race, single sculls, between George Dabnett and Hinton, local amateurs. The race will probably occur in August. Y. M. C. A.—The regular monthly meeting of the Board of Managers will be held this evening at 8 o'clock. Entertainment for boys to-morrow at 4 P. M. All boys are invited. Florence Smith, Treasurer and Sybil Monroe, Secretary, of the Y. M. C. A., interested in the Flower Mission to gather at the Y. M. C. A. rooms to-morrow, Saturday morning at 9 o'clock. A team of horses attached to a heavy truck ran the length of the depot on State street, this morning, and were then cleverly stopped by a teamster who jumped from another wagon. Miss Maggie White, and Miss Lida A. White, of the Y. M. C. A., accompanied by Miss Hannah Lawrence, all of Ocean Grove N. J., are visiting in town, the guests of Mr. Zepp. The weather report from the signal office at Washington, to-day, indicates for this region, partly cloudy weather, local rains, moderate westerly, stationary or lower temperature, higher pressure. The shipment of parts of reapers to supply the demand of farmers who have broken some portion of their machine is busy the American Express office just now. The wheat harvest being in progress, gives occasion for much of these shipments. A large party of the Sir Knights of Salem Town Commandery left Auburn at 4:17, this afternoon, and went to Cayuga, whence they were to take a steam yacht for Union Springs. They will return at 12:15 to-night, after a supper and drill at the village. Oyes and men persist in breaking the laws of decency and the ordinances of the city by bathing during the day in the raceway by the big dam. A special officer will be appointed to have the matter in charge and those who break the laws hereafter will do so at a risk. Dr. Boyce has commenced operations toward building his new brick block on Exchange street. The wooden structure is in process of removal to give place to the projected improvement. The change will add quite a handsome feature to Exchange street, and leave but one wooden building on that thoroughfare. The National Convention of Free Thinkers will be held at Watkins Glen on the 23, 24, 25, 26, and 27 of August. Col. "Bob" Ingersoll, Ex-Rev. Geo. Milne, Hon. T. B. Wabman and other brilliant speakers will be present and there are hopes also of the attendance of Herbert Spencer and Bradlaugh, the English M. F. Teach the Boys a Lesson. Two babies while playing on State street, at about half past 9 last night, were showered with mud thrown by malicious boys, from the alley way leading to the gas house. The outrage was entirely unprovoked. One of the babies wore an elegant white lace shawl, which was nearly ruined by the mud, and the other had her clothing badly damaged. The young scamps are known, and the police will arrest them next time they practice such an outrage. Plain's Demonstrate. The dry goods clerks made arrangements, yesterday, for another demonstration in front of McConnel & Anderson's; but finding the police on the watch they changed their meeting with walking in

Beating the Atlantic.

The finest ball game of the season in Auburn occurred at the fair grounds, yesterday, between the Four A's and the St. Thomas Athletics, the score standing at the close 4 to 3 in favor of the home nine. The fielding play of both clubs was very fine, the men working together in excellent shape, but the batting was of the weakest. The features of the game on the part of the Four A's were a beautiful catch by Putnam of what seemed a safe hit in the first inning; a neat double play by Hopkins and Vaughn in the second, and the throwing and general playing of Storke, throughout. Green did not cover left field as he was wont to do and there were several bad mistakes in base running; but aside from those considerations the Auburnians played a strong and even game. For the visitors, Collins made a catch in the fifth inning equal to Putnam's in the first. Ermise caught Myers very neatly at second, and Tray, who was put behind the bat in the third inning, pluckily captured, on the bound, a foul tip which had struck him in the stomach. The game was watched by a considerable crowd who grew very enthusiastic over the exhibition of good playing. Joe Young, of Syracuse, umpired in the game in a manner such that no dispute arose as to any decision. The full score of the game is here appended:

Table showing baseball scores for Four A's and Atlantic teams, including runs, hits, errors, and fielding percentages.

A Happy Family.

An amusing incident in animal nature is seen on State street, where a good natured canine has taken upon himself the championship of a cat. Pussy often occupies the hallway of the block in which she lives, and outside dogs are naturally apt to attack her as they come along. But her canine friend does not allow any such work. He squirms himself up to the front as soon as any other dog comes, and after making way for the cat to get to the rear he goes for the invader and, soon settles the right of his weaker friend to bask in the sun of that doorway, unharmed.

Where They Are.

The Woodsport Scoutline thus disposes of the following Auburnians: Mrs. Maud Wilkinson of Auburn is visiting her father, Y. Wheeler of Meriden. Rev. Mr. Twichell of Auburn has been engaged as pastor of the Reformed church at Cato. James Ferris and wife and Lyman Soule of Auburn are rusticating in Cato and Conquest. Royal Stevens, wife and child of Auburn, the guests of his brother Perry Stevens of Brutus. A Clue. The Rambler crew wear red hats.—Racco Journal.

Good News to All.

Wm. Peacock, jr., has just received at his Furniture Ware rooms 6 and 10 Hill-st., Peacock block, 4 car loads of Chamber suits, Bedsteads, Bureaus, &c. made from the best seasoned material, bought at special prices, which he has put on sale for less than ever sold in the state to make room for the large stock he is now having manufactured for fall trade. Call and see for yourself. July 22nd & 23rd.

Good Furniture and cheap at Wm. Peacock's, 6, 8, & 10 Hill-st.

Blair-Foy Examinations Free.

By Dr. E. F. Butterfield. There is no subject that requires so much study and experience as the treatment and cure of Chronic Diseases. The astonishing success and remarkable cures performed by Dr. Butterfield are due to the gift of Clairvoyance to the long study of the constitution of man and the curing of the cases from natural remedies. Let those given up by others, call for examination. He cures the worst cases of Scrofula, Catarrh, Piles, Female Weaknesses, Asthma, Diseases of the Heart, Lungs and Kidneys. He will be at the National Hotel, Auburn, Monday and Tuesday, August 7th and 8th. Guarantees to cure every case. Bills and money taken until a cure is effected and the neighborhood takes the ben-

David Shaw's Death.

Particulars of yesterday's horrible fatality—SUICIDE HELD. The terrible fatality which David Shaw, of No. 76 Fitch avenue, lost his life yesterday, was briefly noted in the NEWS AND BULLETIN, but owing to the lateness of the hour details were not available at the time. Close inquiry among eye witnesses of the accident enables a correct report to-day. At about ten minutes to 4 o'clock yesterday afternoon, David Shaw, cartman, was called to D. M. Osborne & Co's No. 1 office on Genesee and Mechanic streets, to draw some extras to the express office for shipment. A clerk in the office got into the wagon with Mr. Shaw, and they drove up Mechanic street toward the "extra" Department. At that time Yard Master Lewis Chauncey, Jr., was preparing to drop some empty coal jimmies down the hill from the coal yard, into the switching yard at the foot of the hill on Mechanic street, the yard being on the west side of the street. He directed two of his men, Crawford and Sperry to go up the hill and let the jimmies run down when he should give them a signal that the track was clear. The did go, and just as they started down, with the brakes all set and the two men on board to manage them, the wagon turned from Genesee into Mechanic street. Mr. Chauncey stood on the crossing with a signal man, Mr. Coffin, and gave the signal for Mr. Shaw to stop. Shaw stopped short at the check room door, about six rods from the curve where the track turns into the yard. But he suddenly whipped up his horse and drove straight up the hill, on the east side of the track, and when ten feet from the track dropped the reins and jumped out, leaving the clerk to recover the lines and stop the horse just in time to escape the cars. Shaw ran in a stumbling manner, across the track and into the yard as if dazed. Just after he went through the gateway, and on the track the bumper beam of the first car struck him in the back throwing him down across the rails. As the wheels struck him, he was rolled a head for about a rod, until the wheels finally ran over him, the cars giving a jump as they passed over. When the jimmies had passed, it was found that the unfortunate man's head had been nearly severed from the neck, and one arm was severed in two places, while one foot was cut across diagonally over the instep. He showed no signs of life whatever, not even a quiver of the muscles being perceptible. Mr. Shaw was fifty-five years of age, and well known about town as a quiet and industrious citizen. During the administration of Mayor Walley, he was a member of the police force. He had lately taken up the express business, and had been so engaged for the past two months, having his stand on Genesee street, east of the corner of State-st. He leaves a widow, his second wife, and fourteen children, of whom the youngest is aged two years. His funeral will be held on Saturday morning, from St. Mary's church. Coroner Frye was notified of the fatality and made a personal investigation of the facts, which satisfied him that it was purely accidental, that no blame could in anywise attach to the employees of the road, and that no inquest was necessary under the circumstances.

His Intentions Were Good.

John Johnson, the man who was yesterday mentioned in connection with an unsettled board bill at Thomas J. Hale's house and Officer Tobin's visit to Groton, claims to have given notice that he was going away, that he left his son at the house and undrawn wages at the shop where he had been employed, that he intended to come back, that he had no intention of defrauding Mr. Hale out of his board.

Ben Webster's Hurt.

Supervisor Ben Webster met with a painful accident, yesterday afternoon, which will confine him to the house for a few days. He was engaged in unloading his express wagon at one of the doors of the freight house, and stepping too far backward, he fell to the ground taking with him a heavy box which struck him on his chest. Fortunately no bones were broken, but he was severely bruised and was to-day unable to arise.

The New Directory.

Williams' new "Directory of Auburn and the Farmers of Cayuga Co." is just issued from the press and book-binders of Wm. C. Moses and is a work neat typographically, excellent orthographically, of value geographically and altogether the most complete work of the kind ever issued in Auburn.

What Courtney is Up To.

A new turn in the tartar ecme affair. Yesterday was revealed a new phase of the proceedings against John H. Robertson who was arrested on a warrant issued by Justice Samuel H. Bearley, on complaint of Chas. E. Courtney. The examination, conducted by Justice Bearley for people and E. Wood Esq., for Robertson, opened at Village Hall, yesterday afternoon, by placing Courtney on the witness stand. Dr. O. W. Smith was next called, after which the court adjourned until to-day at 8 a. m. There seems to be a misunderstanding between the parties to this movement and the charges which are being prosecuted the investigation. It is understood that a warrant had been issued by Justice Carr, at their instance, for the arrest of Robertson, which movement was anticipated by the one now in progress.—Auntie Springs Advertiser.

Oh Phaw!

The 4 A's of Auburn are undoubtedly a good base ball club, but so far this season they have only been able to defeat the Stars once and the Registers of Moravia not at all.—Moravia Register. A young lady of Harlem was recently induced by her mother to be fondling and kissing a pet kitten.—"Why, Mary," said the mother, "you have kissed that kitten more in five minutes than you have me in five years." "Don't you know I'd rather kiss the kitten than you, mother?" "No, my child."—"You haven't got whiskers!" Said Bill to Jack, "How many legs would a calf have, calling the tail one?" "Five," answered Jack. "No, it would not," said Bill, "for calling the tail one wouldn't make it so, would it?" When it was known that a woman at Franklin, Ky., was promening the street with a revolver in hand, 132 different men had business up-stairs and down-cellar and could not be disturbed.

W. W. Robinson's Case.

It is rumored at the residence of the plaintiff. The court in the Edgar Robinson forgery case resumed its session at 10 o'clock this morning, under some disadvantage in a room at the residence of Mrs. Hoskins, the plaintiff, on Maple street. Court is held there to accommodate Mrs. Hoskins, who is not able to get down street. The room is very naturally rather warm, but Recorder Coates has a good place by a cool window and the lawyers suffer the worst effects of the warmth. The prisoner is quite wide awake and when Frank D. Wright, one of his lawyers, seemed to yield somewhat to the latent somnolence in the atmosphere, he called out to the legal gentleman that it was time to wake up and attend to the case. Mrs. Hoskins has been examined during the day and corroborated her previously published statements in regard to the mortgages, going through her deposition clearly and concisely. The story of the first mortgage was told this morning and the court then adjourned until 2 P. M. It was thought about two days would be consumed in the case. The plaintiff and prisoner shook hands when they met this morning, and seemed to be on excellent terms.

Ben Webster's Hurt.

Supervisor Ben Webster met with a painful accident, yesterday afternoon, which will confine him to the house for a few days. He was engaged in unloading his express wagon at one of the doors of the freight house, and stepping too far backward, he fell to the ground taking with him a heavy box which struck him on his chest. Making G. A. R. Badges.

William Halston Balch, in the Industrial Review, gives an interesting description of the making of the G. A. R. badge by the sole manufacturer, Joseph C. Davidson of Philadelphia. Mr. Davidson is also making the badges for the Loyal Ladies League. The adoption of the design did not end the trouble of its being manufactured out of captured cannon; and the contractor who undertook to supply the badges contented himself with making them of gun metals, copper and tin; but not of gun-metal, which has ten parts of tin to ninety of copper; and as therefore, excessively hard; indeed, harder than iron. As soon as it was discovered that he was not carrying out his contract according to its terms; the manufacture of the badges was turned over to the United States Mint. Here a protest was made against using gun-metal, as it was so hard that it injured the die. In fact, the Mint authorities refused, after much experimenting, that it was not possible to strike the medals from gun-metal. Mr. Joseph K. Davidson, a manufacturing jeweler of Philadelphia, thought otherwise, and struck a number of badges from pure gun metal, much to the discomfiture of the Mint. Mr. Davidson was therefore, in May, 1877, given the contract for their manufacture. This he has ever since carried on, to the entire satisfaction of the Grand-Army. The process of manufacture of these badges is somewhat slow, although twenty thousand of them turn out, as one end, they are made first taken in the form of old cannon, and melted down into pigs. In its ordinary state it is too hard for the good working of the dies; and it is therefore alloyed with twenty per cent. of copper and five of zinc. This alloy is added when it is melted together, and run into sheets, in moulds that cast the upper side of the star in the rough; that is, only the figures and some of the bolder portions of the design. The stars are now taken to the stamping press, which Mr. Davidson has erected in a carpenter shop just off of Fitch street. Here, as one end, they are made first taken in the form of old cannon, and melted down into pigs. In its ordinary state it is too hard for the good working of the dies; and it is therefore alloyed with twenty per cent. of copper and five of zinc. The stars are now taken to the stamping press, which Mr. Davidson has erected in a carpenter shop just off of Fitch street. Here, as one end, they are made first taken in the form of old cannon, and melted down into pigs. In its ordinary state it is too hard for the good working of the dies; and it is therefore alloyed with twenty per cent. of copper and five of zinc. This alloy is added when it is melted together, and run into sheets, in moulds that cast the upper side of the star in the rough; that is, only the figures and some of the bolder portions of the design. The stars are now taken to the stamping press, which Mr. Davidson has erected in a carpenter shop just off of Fitch street.
